

Film.io Community Update | June 2025

Dear [Film.io](#) family, we want to take a moment to speak directly and transparently about the state of the Film.io project, the FAN Token, and what lies ahead.

 **Yes, we're still here. Yes, we're still building.**

We understand that some community members have serious questions. Some of you have shared in the recent volatility. And many of you are wondering what comes next.

Here's what we can share, clearly and without spin:

Market Conditions

The price of \$FAN has been significantly impacted in recent months. This is due in part to weaknesses in the tokenomics model and increased pressure from automated trading bots that exploited the existing structure.

In response, the Global Creativity Foundation (GCF) has directed the following initiatives:

- Delist from Biconomy (in progress) which has been the source of certain issues
- Focus efforts on strengthening conditions on MEXC and removing monitoring status
- Begin transitioning from Polygon to a more strategic chain (under active review)

Next Steps on Tokenomics

GCF has approved a major structural fix: the **burn of ~3 billion unallocated \$FAN**. These tokens were never released or sold, and should not have been minted to begin with, but their existence created the appearance of inflationary pressure on the model, and have artificially inflated the total supply figures on CMC and CG. A separate update will share the timeline and process.

Superfan Utilities Are Coming

The FAN Token's use case is evolving. A major platform update will introduce:

- Film Credit Certificate (your name in the credits)
- Superfan Leaderboards with real perks
- Access to exclusive Greenlight Meetings and events
- Deeper integration into the film financing lifecycle
- Superfans who want even more involvement get early access to participate in Filmio Studios upcoming equity round for accredited investors.

This is just the beginning. More use cases will roll out with each platform phase.

Real Films. Real Funding. Real Industry Movement.

FAN Token already powers one of the largest on-chain governance platforms for film. Over 210 million FAN have been staked to validate original titles.

Now, with Filmio Studios raising capital and preparing its first funding slate, the connection between FAN governance and real-world film financing is about to become stronger than ever.

As an example, Filmio Studios has signed a deal with one of the most prolific TV show runners of our time, for the co-development of an exciting upcoming streamer series, and FAN will play a central role in the process.

To the Community

We've heard your concerns. We're not ignoring them.

We cannot and will not offer financial advice. We do believe in the long-term value of FAN and the broader mission. We believe that film financing, fan validation, and open access can rewrite how stories are told and funded.

The project is early. The conditions are hard. But the progress and traction are real and accelerating.

More frequent updates are on the way. Thank you for staying with us.

The Film.io Team
